We needed a research-based structure that would be easy for teachers to implement. We see a lot of teacher turnover, especially in special education ...[A] scripted program that allows teachers to hit the ground running was necessary. We found that with SPIRE.”

SPIRE Success in Oakland Unified School District

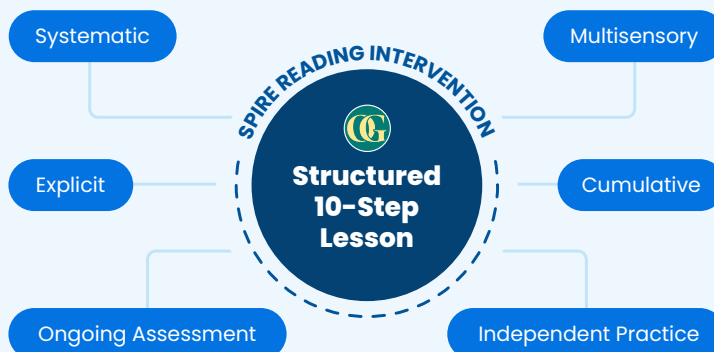

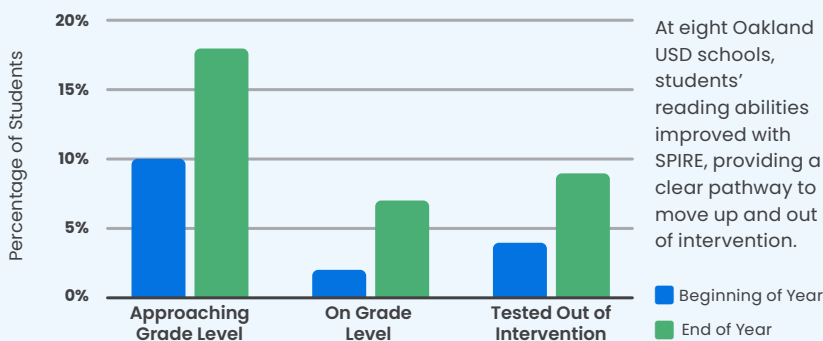

Oakland USD needed to expand access to high-quality reading intervention for students with IEPs in response to AB 1369 dyslexia legislation and its goal of having strong third-grade readers. The district sought an easy-to-implement, evidence-based solution for consistent results—and found that SPIRE delivered.

This study showed SPIRE helped 40% of striving readers move up at least one performance band in a year. Teachers reported increased student confidence, engagement, and preparedness for advanced interventions, proving that the right tools and instruction can overcome reading challenges.

2023-2024 School Year

What Sets SPIRE Apart

SPIRE is an evidence-based, Orton-Gillingham-based multisensory reading intervention for PreK–8+ students in Tier 3 and special education. Grounded in the science of reading and Structured Literacy, it delivers intensive instruction across all five pillars of reading.

- ✓ **Proven Effective** – Structured Literacy, Orton-Gillingham-based, with decades of success.
- ✓ **Teacher-Friendly** – Softly scripted, step-by-step lessons provide structure with flexibility.
- ✓ **Easy to Implement** – Teachers can get started with just one day of training.

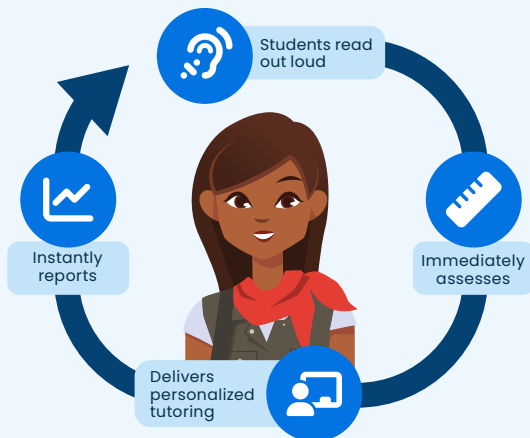

SPIRE Independent Practice

EPS READING ASSISTANT

Practice with Complex, Connected Text for Fluency and Comprehension

Use an AI-powered tool in conjunction with SPIRE to provide students with valuable oral reading practice as they read appropriately challenging complex texts.

The technology behind Reading Assistant is **ESSA-approved** and received the first-ever **CODIE award for Best Science of Reading Skills Solution**.

SPIRE DECODABLE READERS

Skills-Focused Practice for Lesson Reinforcement

120 decodable readers ensure students have ample opportunities to directly apply the specific skills taught during teacher-led lessons.
