## Lady Liberty

The Statue of Liberty is a symbol of freedom to people all over the world. Since 1886 it has welcomed **immigrants** who sail into New York harbor to begin a new life in the United States. Like many of them, Lady Liberty, as the statue is **affectionately** known, had to overcome some difficulties before reaching these shores.

The statue was a gift from the people of France to the people of the United States. It was given in honor of the friendship between the two countries and the one-hundredth anniversary of the American Revolution. But before the statue could be put in place, the people of the United States had to provide a **pedestal** for it at a cost of one hundred thousand dollars. That turned out to be no easy task. A fund-raising drive was launched and ran into immediate difficulties. Newspapers across the United States ridiculed the effort. They argued that because the French were sending over the statue, they should be the ones to pay the extra costs involved for the base.

Despite this opposition, the effort to raise the money continued. A forty-foot-high section of the right arm, with the hand **clasp**ing the torch of liberty, was sent to the United States. It was displayed at the 1876 Philadelphia **exhibition** marking the one-hundredth birthday of the United States. Visitors paid fifty cents to climb onto the balcony surrounding the torch. Many other fund-raising events were also held. But even after several years, **contributions** fell far short of the total needed. The future of the entire project seemed in doubt. Not until a newspaper **appeal** promised to print donors' names was the necessary money raised.

With the success of the project assured, the rest of the statue was finally shipped from France. It arrived in pieces packed in over two hundred wooden crates. The work of assembling it proceeded without further delay. A public holiday was **declared** on October 28, 1886, when the Statue of Liberty was at last **unveiled**. It was one of the largest gatherings ever in New York City. The island where the statue stands is called Liberty Island. It is reached by a short **ferry** ride from lower Manhattan. At just over 305 feet, the statue was the tallest structure in New York City. Though it is now dwarfed by the **lofty** skyscrapers of Manhattan, at the time it was the most **conspicuous** landmark in the city.

In the 1880s, people seeking a better life were flooding into the United States. They arrived at the rate of one million a year. Many of them came from Russia and Eastern Europe; they had been cruelly **persecuted** by their governments and were fleeing to safety. Others were escaping the **poverty** of their native lands in search of a more prosperous life in America.

The museum at the base of the statue contains a bronze tablet placed there in 1903. On it is a poem written twenty years earlier by Emma Lazarus, whose own family had fled Russia. The poem has captured the imagination of the American people and has become forever associated with the Statue of Liberty. It ends with these **eloquent** lines:

Give me your tired, your poor,  
Your huddled masses yearning to breathe free,  
The wretched refuse of your teeming shore;  
Send these, the homeless, tempest-tost to me,  
I lift my lamp beside the golden door!

## Fun & Fascinating FACTS

.....

- The Latin word for *foot* is *ped*, and several English words, such as *pedal* (a lever worked by the foot) and *pedestrian* (a person going on foot), come from it. Because a **pedestal** is a base that stands at the foot, or lowest part, of a statue, column, or similar object, you might think that *pedestal* comes directly from *ped*. Actually it comes from an Italian phrase, *pie di stallo*, which means “a foot (or lowest part) of a stall.” Because the Italian word for *foot* comes from *ped*, it’s correct to say that the English word *pedestal* also comes from it, but in a roundabout manner.

.....

- An **immigrant** is a person who enters a country intending to live there. An *emigrant* is a person who leaves one country to settle in another. In the late nineteenth and early twentieth centuries, many people *emigrated* from Europe and arrived in the United States as *immigrants*.

.....

- **Persecute** and *prosecute* are similar-sounding words that are sometimes confused even though they have quite separate meanings. To *persecute* someone is to make that person suffer because of political, religious, or other beliefs or characteristics.. To *prosecute* someone is to bring that person to trial for criminal acts.

## Fun and Games

Have you ever invented a new game or toy? Lots of people have, and most of them would tell you that it's not all fun and games. In fact, inventing and producing games is a very serious business.

Many of those who have tried to interest a company in their inventions have a common **gripe**: Most companies will not consider an idea from someone unknown to them. Companies prefer to deal only with established inventors with whom they have developed a long-term relationship. These veteran inventors have a **knack** for thinking up ideas—lots of them—for new toys and games. Just as important, they are willing to spend the time to develop their ideas. Only then do they take their new game or toy to a company and try to sell it.

Toys and games are big business. People may complain that they have less **leisure** time than they used to, but today they spend far more money on ways to fill this time. Billions of dollars are spent this way in the United States alone each year. Toy stores do a **brisk** business in the weeks between Thanksgiving and the end of the year. They can **anticipate** selling more toys and games in this one period than in the entire rest of the year! Companies **compete** to meet the enormous demand by engaging in a perpetual search for new products. These companies aren't interested in warmed-over ideas from previous years; they are looking for something **unique**.

Originality may be the main consideration, but companies must also keep other **factors** in mind when deciding which games or toys to produce. First, the cost of producing a new product is very important; the less **complicated** the toy or game is, the cheaper it will be to make. Companies also take into account the age of the children for whom the toy or game is intended; if it is easy to understand, then younger children will be able to play it. The result is an increase in the number of likely buyers. Finally, the larger companies with big advertising **budgets** must ask whether they can make an **effective** television commercial for the new product.

Producing a new toy or game is risky, but the rewards can be great. If a company **errs** by putting a lot of money into a new toy or game that fails to sell, the company can go **bankrupt**. If it is successful, on the other hand, everyone is ecstatic. Even success is not without risks. Should a game or toy

catch on, the maker may not be in a position to meet the sudden demand. By the time the factory is able to turn out the items, the **fad** may have died down. Then the company is left with tens of thousands of items it cannot sell.

In fact, most toys and games do have **brief** lives, but there are always exceptions. Monopoly has been a popular game for more than eighty years. Over 250 million Monopoly games have been sold. Of course, only a handful of lucky inventors create highly successful new toys or games and become millionaires. But inventors are natural optimists. That is why there is no shortage of newcomers eager to break into this high-stakes business.

## Fun & Fascinating FACTS

.....

- **Effect** is a verb and means “to make happen.” It is also a noun and means “a result.” *Affect* is a verb and means “to cause a change in.” (The bus strike will *affect* our travel plans.) It also means “to pretend to have.” (He *affected* a British accent when in England because he didn’t want to sound like a tourist.)

.....

- **Unique** means “the only one of its kind.” It is incorrect to say that something is “very *unique*” or “most *unique*”; if something is the *only* one of its kind, it cannot be compared to something else.

.....

- In addition to meaning “something that contributes to a result,” **factor** is also a term used in mathematics, where it has two separate but related meanings.

A **factor** is one of two or more numbers that divide a given number without a remainder: 2, 3, and 5 are *factors* of 30, as are 5 and 6, 3 and 10, and 2 and 15.

A *factor* is also the number of times a given number is increased or decreased. A population that goes from 2 million to 6 million has increased by a *factor* of 3.
